# Salasartan SA-R7

**SALASARTAN SA-R7** is a nitrogen containing polymeric resin syntan suitable for processing all types of leathers.

## Characteristics:

| | | |
|---|---|---|
| Appearance | : | Pale brown coloured powder |
| Active matter | : | 95%+/-2% |
| pH of 10% solution | : | 6.0 – 8.0 |

## Properties:

Salasartan SA-R7 is useful in filling belly portion of leather while using dueing retannage. It's use in retanning avoids belly to neck variation thereby improving the cutting value of leather.

Salasartan SA-R7 has selective filling action mainly on loose structured parts of leather. It is very much suitable for good buffing properties on Nubucks/ Suedes.

Salasartan SA-R7 is a "free from free formaldehyde" syntan and can be used with other synthetic or vegetable tannins. It can be used for all types of leather articles.

## Indications for application:

4.00 % - 6.00 % on shaved weight for full grain or corrected grain leathers.
2.00 % - 4.00 % on shaved weight for garment leathers.

## Shelf Life / Storage Stability:

One year if stored properly at ambient temperature in supplied packing.

## Packing:

25 Kgs Brown Paper Laminated HDPE Fabric Bag.
